SUMMARY

I am a motivated Information Science and Engineering undergraduate with hands-on experience in software and mobile application development using Flutter, C, C++ and Java. I have a strong foundation in core computer science concepts such as data structures, DBMS and web technologies. Through academic projects and hackathons, I have demonstrated my ability to design, develop and deliver practical, user-focused applications while working effectively in team-based environments.

EDUCATION

1. Vikasa Vidya Samithi, Shivamogga, Karnataka, India - 10th | 86% & 12th |88% [Karnataka State Board]
2. Sir M Visvesvaraya Institute Of Technology, Bangalore-Information science And Engineering, Graduating year-2027 [current: 6th semester] CGPA – 8.88

SKILLS

Programming & Software Development

• Programming in C, C++, and Java

• Object-Oriented Programming and Problem Solving

• Data Structures and Algorithm Fundamentals

Mobile & Web Development

• Cross-Platform Mobile App Development using Flutter

• Frontend Web Development with HTML, CSS and JavaScript

Database & Backend Fundamentals

• Database Management Systems (DBMS)

• Basic Backend Logic and Data Handling

• Application-Level Data Storage and Retrieval

Soft Skills

• Communication and Presentation

• Teamwork and Time Management

• Adaptability and Continuous Learning

Tools & Technologies

• Flutter SDK and Android Studio

• Version Control Basics (Git/GitHub – academic use)

PROJECT

1.Samvaada – Debate Application

1st Place | College-Level Hackathon (2025) | Flutter | Mobile Application Development

• Designed and developed a Flutter-based debate application under the theme "Speak Up", enabling users to participate in structured debates on various topics.

• Implemented real-time user interactions, intuitive navigation, and responsive UI to encourage active engagement and meaningful discussions.

• Focused on clean UI design, smooth performance, and usability across multiple devices while working under competitive hackathon constraints.

2. Line Following Robot

2nd Place | College-Level Hackathon (2025) | Embedded Systems | Robotics

• Designed and built an autonomous line-following robot within an 8-hour hackathon, capable of accurately detecting and navigating predefined paths.

• Implemented sensor-based line detection using IR sensors and optimized motor control logic for smooth and efficient movement.

• Collaborated under strict time constraints to integrate hardware and software components, ensuring reliability and competitive performance.

CERIFICATIONS

- 1st Place – College-Level Hackathon | Sir M Visvesvaraya Institute of Technology (2025)
- 2nd Place – Ideathon | Plinth – Techno-Management Fest, LNMIIT Jaipur (January 2026)
- 2nd Place -Hardware Hackathon – BOTQUEST | IEEE & Inversa Technosoft | KSSEM
- 2nd Place-AIKYA 2025 Project Expo – EPCET (2025)
- Micromouse Competition – IIT Guwahati (2025)
- IEEE Mini Project Symposium – ATME, Mysuru (2025)
- IoT & Applications Training – SMVIT (2025)
